

BRIEF COMPANY PROFILE

ECOSOLUTIONS is working in the area of renewable energy.

ECOSOLUTIONS provides a broad range of services that fully cover the special needs of customers, with a wide range of solutions and applications, providing integrated solutions and technical services of the highest standard, implementing energy projects and investments.

We design, install, and deliver clean energy systems for residential and industrial use.

ECOSOLUTIONS offers turn-key solutions to its clients; it can undertake the design, study, licensing, financing procedures, project management, installation and technical support of such energy projects.

It also provides consultancy services and support for financing issues and the submission of financing proposals through subsidized programmes (Investment incentives laws).

The company's customer-oriented philosophy, its experienced and skilled staff and associates (engineers, economists, environmentalists, lawyers) and its high quality services constitute a competitive advantage, making ECOSOLUTIONS the ideal partner for the implementation and financing of energy projects.

We provide solutions for production and saving energy.

Our products and services include:

- Grid-Connected Solar (Photovoltaic) Systems
- Off - Grid Photovoltaic & Hybrid Systems
- Advisory services to customers
- Small wind turbines
- Solar thermal Plants (with Abengoa Solar)
- Geothermal installations (with Immosolar)
- Led lighting solutions (import and installations)

Due to our strategic cooperation in the area of renewable energy, the use of high quality products and collaboration with highly skilled professionals, we have the capability of offering high quality products and services of maximum efficiency.

EcoSolutions' goal is to cooperate with the customer and offer the right guidelines, in order to meet customer's expectations and fulfil his needs for a solution with limited maintenance needs and a vast lifetime span.

Our services cover all needs, regardless how big or small they are.

The aim is to set the right conditions for future development in business relations.
